

Professional Summary: With **React.js** and modern frameworks, I am a skilled frontend developer who uses **external APIs** to create the resulting application. The website is built fully **Responsive** on mobile and tablet devices so that the user does not face any problems. I work in languages like **HTML**, **CSS**, **Javascript** and many other frameworks like **React.js**, **Bootstrap**, **Tailwind css**.

Technical Skills:

- **Languages:** JavaScript
- **IT Constructs:** Data Structures and Algorithms, DBMS
- **Web Development:** HTML5, CSS, SASS, DOM Manipulation, Ajax, Async JS, APIs, Git & Version Control
- **WebDev Tools:** VSCode, Chrome DevTools, Git & Github
- **Frameworks:** Bootstrap, Tailwind, React.Js

Personal Projects:

- **Currency Converter:** Built it using **React.js**. Used **Bootstrap** to style input fields, buttons. Fetched the exchange rate from ExchangeRate-API using **Fetch API**. Used **React Hooks** like **UseState**.
- **CryptoVerse:** Built it using **React.js**. Used **Chart.js** to implement **charts**. Fetched the crypto coins tracker and exchanged Coins from **coingecko-API** using **Axios** Used **React Hooks** like **UseState**.
Crypto currencies enabled with 50+ coins tracked with clean UX.
- **Portfolio:** Built it using **Html**, **Css**, **JavaScript**. Used **Bootstrap** to style input fields, buttons. My **portfolio** website is fully **Responsive** on mobile, tablet device screens.
Crypto currencies enabled with 50+ coins tracked with clean UX.

Education:

- Self-thought(Apna Collage, Youtube)
